

## SAIL REPAIR KITS & SPARE SPLIT RINGS

There are sail repair kits with spare split rings on each keel boat and one in the toolbox for dinghies.

These kits should allow you to perform small or temporary repairs to sails and to replace any missing or damaged split rings – see instructions overleaf.

As a courtesy for the members taking the boat after you and to prevent minor damage becoming major damage, please make full use of the kits!

## INSTRUCTIONS

Please use the tapes and scissors in this kit to repair minor damage to sails:

- The transparent tape is for windows in the sails (BW0900-MY)
- The coloured Nylon tape is for spinnakers (BW090-N)
- The white Dacron tape is for main, jib and genoa sails (BW095)

Please use the split rings to replace any missing or damaged split rings and then tape them securely so that they do not catch on sails, the kit contains:

- 5 small split rings (BL070602) and 5 larger split rings (S3502)
- A reel of insulation / riggers tape (BW089-A)

**Please also try to identify why the sail might have been damaged and take any action to avoid further damage. Damaged or poorly taped split rings are a common cause!**

Please log on the system:

- A brief description of any damage, the repairs you were able to make and the sail reference number (e.g. SUMAIN13)
- An indication whether you feel the sail should also be seen by the sail maker
- If possible send a photo to [ycc-sail-maintenance@cern.ch](mailto:ycc-sail-maintenance@cern.ch)

Finally, if any item is coming to an end, please buy a replacement from Moby Dick or SUI4616 to restock the kit. The numbers in brackets above are the Bucher Walt catalogue references which both shops use.
